PROFESSIONAL SUMMARY

Software Engineer with 1.5+ years of experience developing enterprise applications and AI-powered solutions using ASP.NET Core, C#, Python, Azure, FastAPI, and LLMs. Skilled in Agentic AI, RAG, LangChain, LangGraph, and building intelligent agents to automate enterprise workflows.

PROFESSIONAL EXPERIENCE

Software Engineer

LTM, Noida, Uttar Pradesh

Feb 2025 – Present

ASP.NET Core, Azure DevOps, Python, AI Tools

- Developed and enhanced enterprise applications for client **Halliburton**, implementing feature enhancements, refactoring legacy modules, and delivering scalable solutions supporting business-critical workflows.
- Authored unit and integration tests achieving **90%+ code coverage**, resolved production issues through root cause analysis, and collaborated in Agile teams using Azure DevOps and CI/CD pipelines.
- Designed and developed **ResolveAI**, an AI-powered operations agent that monitors pipeline failures, performs intelligent error analysis, generates resolution recommendations, and automatically notifies L1 support teams.
- Built intelligent automation workflows using **Python, FastAPI, LLMs, and Power Automate**, enabling automated alerts, issue triaging, and operational assistance for engineering teams.
- Contributed to enterprise **Agentic AI initiatives** by developing AI agents and workflow orchestration solutions using **LangChain, LangGraph, RAG, MCP, and vector databases**, improving engineering productivity and intelligent automation.

PROJECTS

Travel Tales

ASP.NET Core · React · SQL Server · Azure · JWT

[Live](#) [GitHub](#)

- Built and deployed a full-stack role-based travel web application using React.js and ASP.NET Core Web API with JWT authentication.
- Implemented secure role-based authorization and REST APIs using Entity Framework Core and Azure SQL Database.
- Deployed backend to Azure App Service and frontend to Vercel, handling CORS, HTTPS, and production configurations.

Bits&Bytes

ASP.NET Core · Angular · Azure SQL · JWT · EF Core

[Live](#) [GitHub](#)

- Architected and deployed a production-ready blog platform using Angular 19 and ASP.NET Core with JWT authentication and role-based access control.
- Designed content management features including Markdown rendering, image uploads, comment threading, and optimized data access using Repository Pattern.
- Deployed backend to Azure App Service and frontend to Azure Static Web Apps with Azure SQL Database.

SKILLS

Backend

ASP.NET Core, C#, Web API, Entity Framework Core, LINQ, REST APIs, Python, FastAPI, Clean Architecture

Frontend

React, Angular, JavaScript, TypeScript, HTML, CSS, Bootstrap

Databases

SQL Server, Azure SQL Database, PostgreSQL, MySQL

Cloud & DevOps

Microsoft Azure, Azure DevOps, CI/CD, Docker, Application Insights

AI & GenAI

Python, FastAPI, LLMs, RAG, LangChain, LangGraph, MCP, Multi-Agent Systems, ChromaDB

Testing

Unit Testing, Integration Testing, xUnit, NUnit, Code Coverage

Tools

Git, GitHub, Visual Studio, VS Code, SSMS, Swagger, Postman, Power Automate, GitHub Copilot, Cursor IDE, ChatGPT

ACHIEVEMENTS

- Received the **Super Crew Spot Award** at **LTM** for outstanding performance and contributions to project success.
- Ranked among the **Top 5 teams out of 400+ teams** in the **Microsoft Hack2Future Hackathon** for developing an AI-powered Agentic AI solution.
